Introduction, Learning Outcomes

Through presenting the main spiritual movements and social changes in Europe, and their influence on architectural approach through characteristic buildings and sculptor's studios, students discover the concept of architecture and the different types of drawings characteristic of this era.

General Course Description and Main Content

The purpose of this course is to outline the main streams of development throughout the ages and to interpret those adopting present concepts of architecture. In lectures, the theoretical and historical relations of architecture are investigated from a general historical, artistic, and architectural, on occasion structural aspect. Architecture of the bourgeois society, which developed in the course of changes in history, is analyzed based on the historicism of the 19th century and events of the turn of century. Thus, early antecedents of present architectural trends and the value of the existing architectural environment are revealed. The following topics are covered in the lectures: architecture of the Contra-Reformation and Roman baroque; manor-house and garden architecture of French baroque; characteristic pursuits of classicism; architecture of the French revolution; ambitions in urban planning.

Methodology

Lectures are held during the semester. Students prepare their separate semester tasks.

Semester task

As a semester task, students have to draw three simple drawing tasks and one complex so called semester drawing. The **simple drawing** tasks should be drawn during a lecture. The task is always related to the previously presented lectures of the semester. So as a simple drawing task students have to make small drawings about a topic that was shown before. All drawings should be prepared on draft papers in the size A/4 or A/3.

The **semester drawing** should be drawn at home. This task is about a single building. Students have to draw a perspective and if it is possible a floor plan and a section or façade of a building. The buildings will be chosen by the lecturer. The drawing should be prepared on a draft paper in the size A/2.

Any kind of manual technique can be used, but pencil is preferred. The use of computer is not allowed.

The semester drawing should be handed in on the last week of the semester (09.05.2016).

Semester tasks should be handed in latest two weeks after the last lecture of the semester: 23.05.2016 12:00

Consultation: On the dates of the lectures and in email: tmolnar@mik.pte.hu
