

### General Information:

<b>Name of Course:</b>	<b>DATABASES _II</b>
<b>Course Code:</b>	PMRRTNB331HA
<b>Semester:</b>	4 <sup>th</sup>
<b>Number of Credits:</b>	4
<b>Allotment of Hours per Week:</b>	2 Lectures+2 practical classes /Week
<b>Evaluation:</b>	Exam
<b>Prerequisites:</b>	-

**Instructor:** **Dr Etelka SZENDRŐI, associate professor**  
Office: 7624 Hungary, Pécs, Boszorkány u. 2. Office N° B-143  
E-mail: [szendroi@mik.pte.hu](mailto:szendroi@mik.pte.hu)  
Office Phone: +36 72 503650 /23639

### Introduction, Learning Outcomes:

The focus of this course is database programming, that is, the development of applications using a relational database (MS SQL Server 2014) as the primary source of data. We will look at the development of such applications from several perspectives: standalone SQL programs (stored procedures, user functions, and triggers); using ADO.NET and Entity Framework. The course helps the students understand the concept of database transaction and apply it appropriately to an application context. After finishing the course students should be able to write scripts of SQL commands, stored procedures, triggers, functions and should be able to develop programs in C# that create, update and produce data in a database using ADO.NET, Entity Framework.

### General Course Description and Main Content:

Students will learn to

1. Create and modify database tables
1. Writing SQL Scripts and Batches
2. Create and modify Stored procedures, triggers
3. Writing User defined functions
4. Transaction processing
  - a. Understanding Locks and Concurrency
  - b. Setting isolation levels
5. Standards of data connections: ODBC, ADO, OLEDB, ADO.NET.
6. Database programming in C# language using ADO.NET DataReader component, DataSet and Entity Framework (two- and three-tier data access models) and use LINQ to create queries and to modify data.

### Methodology:

- **Lectures:** will give introduction to the basic knowledge of stored procedures, user functions, and ADO.NET services.
- **Practices:** Students will be able to create databases, manipulate data, create SQL stored procedure, create programs to manipulate data in databases
- **Exams:** Accumulated knowledge is tested by two exams, one midterm and a final exam.

### Schedule:

The rough outline of the schedule is as follows:

Week 1-4: Introducing Database Programming.

- What is stored procedure? Create Sql script, stored procedures.
- User Defined functions
- Triggers

Week 5: Transaction

Week 6: National Holiday (15 of March)

**Week 7: Midterm Exam**

Week 8-10 Programming in C# using ADO.NET

- ADO.NET Connected model
- ADO.NET Disconnected model

Week 11: **Spring holiday**

Week 12-15: LINQ, Programming with Entity Framework

24<sup>th</sup> of May: **Final Exam****Attendance:**

Attending is required all classes, and will impact the grade (max. 10%). Unexcused absences will adversely affect the grade, and in case of absence from more than 30% of the total number of lesson will be grounds for failing the class. To be in class at the beginning time and stay until the scheduled end of the lesson is required, tardiness of more than 20 minutes will be counted as an absence. In the case of an illness or family emergency, the student must present a valid excuse, such as a doctor's note.

**Grading:**

The Course grade is determined as a combination of 1 midterm exam (45%), a final exam (45%) and attendance of lessons and practices (10%).

All exams are closed-book and closed-notes. A student with a proper excuse of being absent from the examination must inform and get a permission from the teacher prior to the time of examination. Any students who do not take the examination at the scheduled time will receive a zero score.

## Grading Scale:

Numeric Grade:	5	4	3	2	1
Evaluation in percent:	89%-100%	77%-88%	66%-76%	55%-65%	0-54%

Course grade (exams) correction between: 25-31th of May, 2017

**Students with Special Needs:**

Students with a disability and needs to request special accommodations, please, notify the Deans Office. Proper documentation of disability will be required. All attempts to provide an equal learning environment for all will be made.
