

General Information:

Name of Course:	DATABASE PROGRAMMING
Course Code:	PMTRTNM716HA
Semester:	3 th
Number of Credits:	5
Allotment of Hours per Week:	2 Lectures+2 practical classes /Week
Evaluation:	Mid semester grade
Prerequisites:	-
Instructor:	Dr Etelka SZENDRŐI, associate professor Office: 7624 Hungary, Pécs, Boszorkány u. 2. Office N° B-143 E-mail: szendroi@mik.pte.hu Office Phone: +36 72 503650 /23639

Introduction, Learning Outcomes:

The focus of this course is database programming, that is, the development of applications using a relational database (MS SQL Server) as the primary source and sink of data. We will look at the development of such applications from several perspectives: standalone SQL programs (stored procedures, stored functions, and triggers); using ADO.NET and Entity Framework. The course gives introduction to Business Intelligent topic, data analysis. The course helps the students understand the concept of database transaction and apply it appropriately to an application context.. After finishing the course students should be able to write scripts of SQL commands, stored procedures, triggers, functions and should be able to develop programs in C# that create, update and produce data in a database using ADO.NET, Entity Framework and ASP.NET. Finishing the course students will able to design databases for business analysis

General Course Description and Main Content:

Students will learn to

1. Create and modify database tables
1. Writing Scripts and Batches
2. Create and modify Stored procedures, triggers
3. Writing User defined functions
4. Transaction processing
 - a. Understanding Locks and Concurrency
 - b. Setting isolation levels
5. Standards of data connections: ODBC, ADO, OLEDB, ADO.NET.
6. Database programming in C# language using ADO.NET Entity Framework (two- and three-tier data access models)
7. Business Intelligent, data analysis.

Methodology:

- **Lectures:** will give introduction to the basic knowledge of characterise and design databases, manipulate data with SQL language
- **Practices:** Students will be able to create databases, manipulate data, create SQL stored procedure, create programs to manipulate data in databases
- **Exams:** Accumulated knowledge is tested by two exams, one midterm and a final exam.

Schedule:

The rough outline of the schedule is as follows:

Week 1-3: Introducing Database Programming.

- What is stored procedure? Create Sql script, stored procedures.
- User Defined functions

- Triggers

Week 4-7 Transactions

- Create programs in C# with using ADO.NET classes
- ADO.NET Connected model
- ADO.NET Disconnected model

Week 8: **Midterm Exam**

Week 9: **Autumn holiday**

Week 10-11: LINQ, Programming Entity Framework

Week 12-13: Programming Entity Framework

Week 14 Business Intelligent, Data Analysis

Week 15: **Final Exam (Test and problem solving in computer lab)**

Attendance:

Attending is required all classes, and will impact the grade (max. 10%). Unexcused absences will adversely affect the grade, and in case of absence from more than 30% of the total number of lesson will be grounds for failing the class. **To be in class at the beginning time and stay until the scheduled end of the lesson is required, tardiness of more than 10 minutes will be counted as an absence.** In the case of an illness or family emergency, the student must present a valid excuse, such as a doctor's note.

Grading:

The Course grade is determined as a combination of 1 midterm exam (45%), a final exam (45%) and attendance of lessons and practices (10%).

All exams are closed-book and closed-notes. A student with a proper excuse of being absent from the examination must inform and get a permission from the teacher prior to the time of examination. Any students who do not take the examination at the scheduled time will receive a zero score.

Grading Scale:

Numeric Grade:	5	4	3	2	1
Evaluation in percent:	89%-100%	77%-88%	66%-76%	55%-65%	0-54%

Course grade (exams) correction between: 18-22th of December, 2017

Students with Special Needs:

Students with a disability and needs to request special accommodations, please, notify the Deans Office. Proper documentation of disability will be required. All attempts to provide an equal learning environment for all will be made.
