Task description

As a semester task the students have to prepare an infographic about the life and work of an architect. In the first part of the semester, students will choose the most important buildings of the architect. Students have to draw (by hand or by using any kind of graphic software) so called scheme graphics about the chosen buildings. As a second part of the semester task students have to prepare an infographic by using the previously drawn scheme graphics. The projects of the architect should be included in the infographic but also the whole life of the architect with any kind of important facts should be presented. There are not any prescriptions of size, of form of the infographic.

The finished semester task should be handed in only digitally. Scheme graphics and the infographic should be saved in PDF format (resolution 300 dpi).

Every part of the semester task should be collected into a single compressed file. Name of the file is the name of the architect. Scheme graphics are named after the project.

Example to show how to name a task:

Name of the folder: Walter Gropius

Name of a scheme graphic: Bauhaus building.pdf

Name of the infographic: Info_Walter Gropius.pdf

The saved data should be sent to the email address: tmolnar@mik.pte.hu Should the size of the attachment be bigger than 10 MBs it is recommended to use a file transfer system e.g. wetransfer. If it is easier the tasks can be handed in in the time of the lectures by copying it from a USB-stick.
