

General Information:

Name of Course:

Structural Analysis 3. - Finite Element Modelling

Course Code:

MSB386AN (PM-TSTNB042CA)

Semester:

6st

Number of Credits:

3

Allotment of Hours per Week:

1 lecture and 2 Laboratory practice /Week

Evaluation:

Exam (with grade)

Prerequisites:

Structural Analysis 1.

Instructors:

Dr Vanda Olimpia Pomezanski, associate professor

Office: 7624 Hungary, Pécs, Boszorkány u. 2. Office N° B-307

E-mail: vanda@mik.pte.hu

Introduction, Learning Outcomes:

This course is aimed to provide basic and advanced knowledge on the principles and solution methods of the finite element method. Topics covered by the course include: General formulations and basic steps of the FEM design. Geometrical finitization, local coordinate systems, calculation of elementary matrixes, the stiffness matrix, the load vector. Controlling methods. Examples like frames, beams, grids, plates, walls, shells. Usage of an industrial code AXIS.

Methodology:

The course is based on individual engineering skills with regular consultations and presentations.

Topics:

The semester is divided into two principle periods and attendant exercises.

The rough outline of the schedule is as follows:

- Week 1: Models of 2D and 3D Truss type structures, equilibriums.
- Week 2: 2D Truss with different types of supports: bar support, spring support
- Week 3: The State Equation of a Truss
- Week 4: The Stiffness Matrix of a Truss,
- Week 5: **1st Test**
- Week 6: The Flexibility and Stiffness Matrixes of a Beam,
- Week 7: FE Models for simple supported beams,
- Week 8: 2D and 3D Frame Structures
- Week 9: The Load vector. Basic mathematics for FEM
- Week 10: **Break**
- Week 11: **2nd Test** The geometrical finitization, the shape functions.
- Week 12: The elementary stiffness matrixes and the structural stiffness matrixes. Local and global coordinates,
- Week 13: Plane surfaces like slabs or walls, 3D elements
- Week 14: **3rd Test**
- Week 15: Summary

Studio Culture:

The course is based on through collaboration, participation and discussions trough lessons. This is an interaction between Students and Faculty; used the teaching methods like 'Problem-based learning' and 'learning-by-doing'. The communication and work should be reflect a respect for fellow students and their desire to work with regard to noise levels, noxious fumes, etc – from each site of participants.

Attendance:

Unexcused absences will adversely affect the grade, and in case of absence from more than 30% of the total number of lesson will be grounds for failing the class. To be in class at the beginning time and stay until the scheduled end

of the lesson is required, tardiness of more than 20 minutes will be counted as an absence. In the case of an illness or family emergency, the student must present a valid excuse, such as a doctor's note.

Signature / semester mark condition

3 midterm test: 50-50 points

Recognition of the semester is subject to a minimum of 50% each, and attendance at lectures and practice.

Exam: presentation, 150 points, min.: 50%

Evaluation + Grading

Grading will follow the course structure with the following weight:

Midterm Work 50% + Exam 50%.

Grading Scale:

Numeric Grade:	5	4	3	2	1
	excellent	good	satisfactory	pass	fail
Evaluation in points:	91%-100%	76%-90%	61%-75%	50%-60%	0-49%

PTE Grading Policy:

Information on PTE's grading policy can be found at the following location:

Students with Special Needs:

Students with a disability and needs to request special accommodations, please, notify the Deans Office. Proper documentation of disability will be required. All attempts to provide an equal learning environment for all will be made.
