SYLLABUS AND COURSE REQUIREMENTS 2021/2022. II. SEMESTER

Title	Strength of Materials 1
Course code	MSE402ANEM
Weekly hours: lect/pract	1/2
Credit points	4
Curriculum(s)/ type	Architecture BSc./ obligatory
School	English
Requirement	exam
Registration semester	spring semester
Pre-requirement(s)	MSE256ANEP Mechanics 1. (Statics)
Gestor Department(s)	Department of Civil Engineering
Responsible and lecturers	Lujain Ben Khadra associate professor,

INTRODUCTION, LEARNING OUTCOMES

Students continue to learn the fundamentals of mechanics, compression and stressing of bar structures, which helps them with dimensioning basic structural components of construction and selecting the most appropriate materials. To assist with this, students learn the rules of technical and building constructional representations and various structural systems.

CONTENT

General Course Description and Main Content: In particular, students cover the following topics: stress and deformation, Hooke's Law, axial pre-stressing and compression of bar structures, pure shear, design of bolted joints, wooden joints, bending stress, perpendicular and oblique bending, shear stresses with simultaneous bending, eccentric stresses of materials with and without tension strength.

Lecture and Practice:

- 1. Introduction. Course description. Orientation.
- 2. Introduction. Geometrical properties. Centroid, first and second moments of inertia.
- 3. Product of inertia, principal directions.
- 4. Stresses. Principal stresses. Mechanical properties of materials.
- 5. Strains. Normal strain, shear strain, Cartesian strain components. Transverse contraction.
- Normal stresses in case of axial loading.
- 7. Mechanical properties of materials. Stress-strain diagrams. Elastic and plastic behaviour. Hooke's law. Design of cross sections.
- 8. Shear stresses in case of simple shear.
- 9. Bolted joints in single and double shear. wooden joints.
- 10. Pure torsion
- 11. Simple and coupled bending
- 12. Shear stresses with simultaneous bending, Zhuravskiy's formula.
- 13. Exam

EVALUATION AND GRADING

Attendance: Attending is required all classes. In case of unexcused absence from more than 30% of the total number of lessons will be grounds for failing the class. To be in class at the beginning time and stay until the scheduled end of the lesson is required, tardiness of more than 20 minutes will be counted as an absence. In the case of an illness or family emergency, the student must present a valid excuse, such as a doctor's note.

Signature / Grading: The exam grade is based on homework 70%, end semester test using Neptun program 25%, attendance 5%. Details are discussed on the practice.

Grading Scale:

0 – 50 % failed (1)

51 – 62 % passed (2)

63 – 75% satisfactory (3)

76 – 87 % good (4)

88 - 100 % excellent (5)
