

COURSE SYLLABUS AND COURSE REQUIREMENTS

ACADEMIC YEAR 2023/2024 SEMESTER FALL

<i>Course title</i>	<i>Geotechnics 3. (Foundations)</i>
<i>Course Code</i>	MSB137AN-EA-00
<i>Hours/Week: le/pr/lab</i>	2 lectures, 2 practice /week
<i>Credits</i>	4
<i>Degree Programme</i>	B.Sc in Civil Engineering
<i>Study Mode (TVSZ-ben training schedule)</i>	
<i>Requirements</i>	None
<i>Teaching Period</i>	7th
<i>Prerequisites</i>	None
<i>Department(s)</i>	Civil Engineering
<i>Course Director</i>	
<i>Teaching Staff</i>	<i>Ali Mohamed Mohamed Salem</i>
<i>Hours/Week: le/pr/lab</i>	2 lectures, 2 practice /week

COURSE DESCRIPTION

Neptun: Instruction/Subjects/Subject Details/Basic data/Subject description

This course is aimed to provide basic and advanced knowledge on the principles and design of the different type of foundation. Topics covered by the course include: soil site explorations, bearing capacity of soil, shallow foundations, deep foundations, pile caps, soil improvement, Site Dewatering and supported deep excavation.

This course is designed to teach students how to calculate bearing capacity of soil for different site conditions. Explaining different techniques of soil site explorations. Explaining and discussing methods of designing different types of shallow foundations. Explaining and discussing methods of designing different types of deep foundations. Teaching student different methods of structural design pile caps. Teaching students different methods of soil improvement, Site Dewatering, and supported deep excavation.

SYLLABUS

Neptun: Instruction/Subjects/Subject Details/Syllabus

1. GOALS AND OBJECTIVES

Neptun: Instruction/Subjects/Subject Details/Syllabus/Goal of Instruction

This course is aimed to provide basic and advanced knowledge on the principles and design of the different type of foundation. Topics covered by the course include: soil site explorations, bearing capacity of soil, shallow foundations, deep foundations, pile caps, soil improvement, Site Dewatering and supported deep excavation.

Students will gain from this course:

- knowledge of soil exploration and bearing capacity of soil,
- Understanding and Practical knowledge of foundation design.
- Knowledge of Ground improvement and supported deep excavation

2. COURSE CONTENT

Neptun: Instruction/Subjects/Subject Details/Syllabus/Subject content

TOPICS

LECTURE	TOPICS
	1. Soil investigation
	2. Bearing capacity of soils
	3. Design of shallow foundation(Strip footing+ Isolated footing)
	4. Design of shallow foundation(Combined Footing)
	5. Design of shallow foundation(Strap beam footing + Raft foundation)
	6. Introduction to deep foundation (Piles material, size, load transfer, technology)
	7. Design of pile (Single pile and pile group)
	8. Design of pile cap
	9. Ground improvement and soil reinforcement

PRACTICE

10. Supported deep foundation + Site Dewatering

1. Bearing capacity of soils
2. Design of shallow foundation (Strip footing+ Isolated footing)
3. Design of shallow foundation (Combined Footing)
4. Design of shallow foundation (Strap beam footing + Raft foundation)
5. Design of pile (Single pile and pile group)
6. Design of pile cap
7. Ground improvement and soil reinforcement
8. Supported deep foundation + Site Dewatering
9. Foundation Project Evaluation

DETAILED SYLLABUS AND COURSE SCHEDULE

ACADEMIC HOLIDAYS INCLUDED

LECTURE

<i>week</i>	Topic	Compulsory reading; page number (from ... to ...)	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	Introduction in Geotechnical Engineering
2.	Soil investigation	Lecture notes and slides	----	
3.	Bearing capacity of soils	Lecture notes and slides	Assignment _1	20-09-2023
4.	Design of shallow foundation (Strip footing+ Isolated footing)	Lecture notes and slides	Assignment _2	27-10-2023
5.	Design of shallow foundation (Combined Footing)	Lecture notes and slides	Assignment _3	04-10-2023
6.	Design of shallow foundation (Strap beam footing + Raft foundation)	Lecture notes and slides	Assignment _4	11-10-2023
7.	Introduction to deep foundation (Piles material, size, load transfer, technology)	Lecture notes and slides	Assignment _5	18-10-2023
8.	Mid-Term Exam			25-10-2023
9.	Design of pile (Single pile and pile group)	Lecture notes and slides	Assignment _6	-----
10.	Design of pile cap	Lecture notes and slides	Assignment _7	08-11-2023
11.	Ground improvement and soil reinforcement	Lecture notes and slides	Assignment _8	15-11-2023
12.	Supported deep foundation + Site Dewatering	Lecture notes and slides	Assignment _9	22-11-2023
13.	Foundation Project Evaluation	Lecture notes and slides	-----	-----
14.	Final Exam,			

PRACTICE, LABORATORY PRACTICE

<i>week</i>	Topic	Compulsory reading; page number (from ... to ...)	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	Introduction in Geotechnical Engineering
2.	Soil investigation	Lecture notes and slides	----	
3.	Bearing capacity of soils	Lecture notes and slides	Assignment _1	20-09-2023
4.	Design of shallow foundation (Strip footing+ Isolated footing)	Lecture notes and slides	Assignment _2	27-10-2023
5.	Design of shallow foundation (Combined Footing)	Lecture notes and slides	Assignment _3	04-10-2023

6.	Design of shallow foundation(Strap beam footing + Raft foundation)	Lecture notes and slides	Assignment _4	11-10-2023
7.	Introduction to deep foundation (Piles material, size, load transfer, technology)	Lecture notes and slides	Assignment _5	18-10-2023
8.	Mid-Term Exam			25-10-2023
9.	Design of pile (Single pile and pile group)	Lecture notes and slides	Assignment _6	-----
10.	Design of pile cap	Lecture notes and slides	Assignment _7	08-11-2023
11.	Ground improvement and soil reinforcement	Lecture notes and slides	Assignment _8	15-11-2023
12.	Supported deep foundation + Site Dewatering	Lecture notes and slides	Assignment _9	22-11-2023
13.	Foundation Project Evaluation		-----	-----
14.	Final Exam,			

3. ASSESSMENT AND EVALUATION

(Neptun: Instruction/Subjects/Subject Details/Syllabus/Examination and Evaluation System)

ATTENDANCE

In accordance with the Code of Studies and Examinations of the University of Pécs, Article 45 (2) and Annex 9. (Article 3) a student may be refused a grade or qualification in the given full-time course if the number of class absences exceeds 30% of the contact hours stipulated in the course description.

Method for monitoring attendance (e.g.: attendance sheet / online test/ register, etc.)

attendance sheet

ASSESSMENT

Cells of the appropriate type of requirement is to be filled out (course-units resulting in mid-term grade or examination). Cells of the other type can be deleted.

Course resulting in mid-term grade (PTE TVSz 40§(3))

Mid-term assessments, performance evaluation and their ratio in the final grade

Type	Assessment	Ratio in the final grade
Attendance	10 points	10%
Assignments and project	20 points	20%
Midterm Exam	30 points	30%
Final Exam	40 points	40%

Opportunity and procedure for re-takes (PTE TVSz 47§(4))

all tests and assessment tasks can be repeated/improved at least once every semester, and the tests and home assignments can be repeated/improved at least once in the first two weeks of the examination period.

Grade calculation as a percentage

based on the aggregate performance according to the following table

Course grade	Performance in %
excellent (5)	85 % ...
good (4)	70 % ... 85 %
satisfactory (3)	55 % ... 70 %
pass (2)	40 % ... 55 %
fail (1)	below 40 %

The lower limit given at each grade belongs to that grade.

Course-unit with final examination

Mid-term assessments, performance evaluation and their weighting as a pre-requisite for taking the final exam

Type	Assessment	Weighting as a proportion of the pre-requisite for taking the exam
1. Attendance	10 points	10%
2. Assignments	20 points	20%
3. Midterm Exam	30 points	30%
4. Final Exam	40 points	40%

Requirements for the end-of-semester signature

The end-of-semester signature is successful if the result is minimum **40** %.

Re-takes for the end-of-semester signature (PTE TVSz 50§(2))

All tests and assessment tasks can be repeated/improved at least once every semester, and the tests and home assignments can be repeated/improved at least once in the first two weeks of the examination period.

Type of examination (written, oral): written

The exam is successful if the result is minimum **40** %.

Calculation of the grade (TVSz 47§ (3))

The mid-term performance accounts for **30** %, the performance at the exam accounts for **40** % in the calculation of the final grade.

Calculation of the final grade based on aggregate performance in percentage.

Course grade	Performance in %
excellent (5)	85 % ...
good (4)	70 % ... 85 %
satisfactory (3)	55 % ... 70 %
pass (2)	40 % ... 55 %
fail (1)	below 40 %

The lower limit given at each grade belongs to that grade.

4. SPECIFIED LITERATURE

In order of relevance. (In Neptun ES: Instruction/Subject/Subject details/Syllabus/Literature)

COMPULSORY READING AND AVAILABILITY

[1.] Primary compulsory reading and its availability
