COURSE SYLLABUS AND COURSE REQUIREMENTS ACADEMIC YEAR 2024/25 SEMESTER 2

Course title	Web programming 1.
Course Code	IVB065ANMI
Hours/Week: le/pr/lab	0/0/2
Credits	4
Degree Programme	Computer Science Engineering
Study Mode	full time course
Requirements	mid-term mark
Teaching Period	2024/2025-2
Prerequisites	IVB053ANMI, Programming 1.
Credits Degree Programme Study Mode Requirements Teaching Period	Computer Science Engineering full time course mid-term mark 2024/2025-2

Department(s)System- and Software TechnologyCourse DirectorLevente SzaboTeaching StaffAnett Lenart

COURSE DESCRIPTION

A short description of the course (max. 10 sentences).

Neptun: Instruction/Subjects/Subject Details/Basic data/Subject description

The main objective of the course module is to provide students with the ability to create a client-side web application at the end of the course, but also to familiarize themselves with server-side database and user and administration web pages. These web applications are relevant in the XXI. century in market life.

SYLLABUS

Neptun: Instruction/Subjects/Subject Details/Syllabus

1. GOALS AND OBJECTIVES

Goals, student learning outcome.

Neptun: Instruction/Subjects/Subject Details/Syllabus/Goal of Instruction

The subject module provides general knowledge in the design and create of websites and other web applications. We describe the functions, tasks that can be implemented by HTML, CSS and JavaScript programs.

We provide students with pre-made sample assignments.

During the practical training, students will be prepared to complete client-side tasks in developing a web site and learn the basics of server-side web programming.

2. COURSE CONTENT

Neptun: Instruction/Subjects/Subject Details/Syllabus/Subject content

TOPICS

LABORATORY PRACTICE

- 1. Description of requirements system, operation of the web
- 2. HTML Syntax, tag anatomy, text-level elements
- 3. HTML Grouping elements, embedded elements, structural division of a web page
- 4. HTML Form creation
- 5. CSS Style sheets, style classes, selectors, inheritance, box model
- 6. CSS Structural design of a website using divs and grids, responsiveness
- 7. HTML5, CSS3: The technique and ergonomics of web page creation
- 8. JavaScript Language basics
- 9. JavaScript Document Object Model (DOM), event-driven programming. Forms.
- 10. JavaScript Ajax, communication with the server.

DETAILED SYLLABUS AND COURSE SCHEDULE

ACADEMIC HOLIDAYS INCLUDED

PRACTICE, LABORATORY PRACTICE

week	Торіс	Compulsory reading; page number (from to)	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	Introduction. Description of requirements. How the web works, client-server model, HTTP, URL.	[1] Webprogramming1_1 folder		
2.	HTML basics: Syntax, tag anatomy.	[1] Webprogramming1_2 folder [2] from https://www.w3schools. com/html/default.asp to https://www.w3schools. com/html/html lists.asp		
3.	HTML: Image insertion, navigation, table creation. Structural division of a web page.	[1] Webprogramming1_3 folder [2] from https://www.w3schools. com/html/html links.as p to https://www.w3schools. com/html/html lists.asp https://www.w3schools. com/html/html5 seman tic elements.asp		
4.	HTML: Forms.	[1] Webprogramming1_4 folder [2] https://www.w3schools. com/html/html_forms.a sp		
5.	CSS: Selectors, display types, box model, colors.	[1] Webprogramming1_5 folder [2] from https://www.w3schools. com/css/css_intro.asp to https://www.w3schools. com/css/css_intro.asp		
6.	CSS: Website structure design using divs and grids.	[1] Webprogramming1_6 folder		

	Responsive websites. Creating a complex website.	[2] from https://www.w3schools. com/css/css_rwd_intro.a sp to https://www.w3schools. com/css/css_rwd_grid.as p [2] from https://www.w3schools. com/css/css_grid.asp to https://www.w3schools. com/css/css_grid.item.a sp [1] Webprogramming1_7 folder		
		[2] from https://www.w3schools. com/css/css templates. asp to https://www.w3schools. com/css/css templates. asp		
7.	JavaScript: Basics, reading and writing data.	[1] Webprogramming1_8 folder		
8.	JavaScript: Functions, objects.	[1] Webprogramming1_9 folder		
9.	JavaScript: Document Object Model (DOM).	[1] Webprogramming1_10 folder		
	Document Object Model (DOM), event-driven programming. Forms. JavaScript - Ajax, communication with the server.	[1] Webprogramming1_10 folder		
10.	Test 1.		Test 1	
11.	Presentations: presentation of project works.		Deadline: Project work	14 April 11:59 pm.
12. 13.	Spring break. Presentations: presentation of project works.			
14.	Re-take test. Presentations: presentation of project works.		Re-take test. Deadline: Re-take project work.	5 May 11:59 pm.

3. ASSESSMENT AND EVALUATION

(Neptun: Instruction/Subjects/Subject Details/Syllabus/Examination and Evaluation System)

ATTENDANCE

In accordance with the Code of Studies and Examinations of the University of Pécs, Article 45 (2) and Annex 9. (Article 3) a student may be refused a grade or qualification in the given full-time course if the number of class absences exceeds 30% of the contact hours stipulated in the course description.

Method for monitoring attendance (e.g.: attendance sheet / online test/ register, etc.)

Attendance at 70% of classes is mandatory. The participation rate does not affect the grade, but an absence of more than 30% results in the subject being refused.

Attendance is checked on the basis of an attendance sheet.

It is a requirement to write a test at the given time and develop a project work.

The test will be held on the week 10. The deadline of the project work (creating a web site) is on the week 11.

The re-take test will be held on the 14th week. The deadline of the retake project work (creating a web site) is on the week 14.

If the student does not participate in the test, she/he will receive a grade 1 for the test that she/he did not write, unless she/he justify her/his absence at the next practical lesson.

ASSESSMENT

Cells of the appropriate type of requirement is to be filled out (course-units resulting in mid-term grade or examination). Cells of the other type can be deleted.

Course resulting in mid-term grade (PTE TVSz 40§(3))

The test and the project work must be completed to a minimum sufficient level (grade 2) to obtain the mid-term mark. The midterm mark is determined by the average of the two grades.

If the student is in doubt after the computer test and the project work then the computer test is more dominant than the result of the project work in the formation of the mid-term mark.

Mid-term assessments, performance evaluation and their ratio in the final grade (The samples in the table to be deleted.)

Туре	Assessment	Ratio in the final grade
Test 1 (Computer test)		51 %
Project work (develop a web site)		49 %

Opportunity and procedure for re-takes (PTE TVSz 47§(4))

The specific regulations for improving grades and resitting tests must be read and applied according to the general Code of Studies and Examinations. E.g.: all tests and assessment tasks can be repeated/improved at least once every semester, and the tests and home assignments can be repeated/improved at least once in the first two weeks of the examination period.

The test can be corrected or replaced once in the week 14.

The deadline of the retake project work (creating a web site) is on the week 14.

Grade calculation as a percentage

based on the aggregate performance according to the following table

Course grade	Performance in %
excellent (5)	85 %
good (4)	70 % 85 %
satisfactory (3)	55 % 70 %
pass (2)	40 % 55 %
fail (1)	below 40 %

The lower limit given at each grade belongs to that grade.

4. SPECIFIED LITERATURE

In order of relevance. (In Neptun ES: Instruction/Subject/Subject details/Syllabus/Literature)

COMPULSORY READING AND AVAILABILITY

[1] Lesson aids, presentations, examplesAvailability: on the Teams interface[2] W3Schools Online Web TutorialsAvailability: https://www.w3schools.com/

[3] HTML (5) + CSS (3) Editing standards-compliant static web pages

RECOMMENDED LITERATURE AND AVAILABILITY

[4] MDN Web docs

Availability: https://developer.mozilla.org/en-US/docs/Learn-web-development
