

COURSE SYLLABUS AND COURSE REQUIREMENTS

ACADEMIC YEAR 24/25 SPRING

<i>Course title</i>	STRUCTURES II
<i>Course Code</i>	MSM406ANEP
<i>Hours/Week: le/pr/lab</i>	1/0/2
<i>ECTS</i>	4
<i>Degree Programme</i>	Structural Engineering MSc
<i>Study Mode</i>	Full-time, in-person
<i>Requirements</i>	Exam
<i>Teaching Period</i>	22/23 Spring
<i>Prerequisites</i>	Structures I
<i>Department(s)</i>	Department of Civil Engineering
<i>Course Director</i>	
<i>Teaching Staff</i>	Tamas Juhasz juhasz.tamas@mik.pte.hu

COURSE DESCRIPTION

This course is aimed to provide basic and advanced knowledge of the principles of surface structures, forms, loads, displacements, and stress fields.

SYLLABUS

1. GOALS AND OBJECTIVES

This course is aimed to provide basic and advanced knowledge of the principles of surface structures, forms, loads, displacements, and stress fields. Topics covered by the course include special problems of model creation, homogenization, anisotropy nonlinearity, the difference between a bent plate and plate in plane stress, general solutions, plates with large displacements, reinforced concrete slabs, 3D plate systems, shell structures, membrane forces, boundaries, boundary problems, bending theory of shell structures, stability problems.

2. COURSE CONTENT

TOPICS

LECTURE,
PRACTICE, LAB

1. Surfaces structures
2. Surface structures of revolution
3. Concrete shells
4. Membranes

DETAILED SYLLABUS AND COURSE SCHEDULE, TENTATIVE

UNFORESEEABLE CIRCUMSTANCES MIGHT AFFECT THE SCHEDULE BELOW.
ACADEMIC HOLIDAYS INCLUDED

LECTURE, LAB

week	Topic	Compulsory reading	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	7th February Registration, introduction in general	[1]		
2.	14th February Mechanics of Slabs, Elastic Plate Theory,	[1]		
3.	21st February Analysis of One-way Slabs	[1]		
4.	28th February Elastic Analysis of Two-way Slabs	[1]		
5.	7th March Flat Slabs	[1]		
6.	14th March Assessment of Existing Structures Using Johansen's Yield Line Method	[1]	Assigning take-home project	
7.	21st March Method of Virtual Work: Beams and Frames	[1]	TBD	TBA
8.	28th March FEM of Concrete Slab-systems	[1]	TBD	TBA
9.	4th April Pollack Expo	[1]	TBD	TBA
10.	11th April Historical Perspective on Thin Shell Concrete Structures	[1]	TBD	TBA
11.	18th April Analysis of Shell Walls	[1]	TBD	TBA
12.	25th April Spring Break			
13.	2nd May Analysis of Cylindrical Shells	[1]	TBD	Collecting take-home projects
14.	9th May Consultation			

3. ASSESSMENT AND EVALUATION

ATTENDANCE

In accordance with the Code of Studies and Examinations of the University of Pécs, Article 45 (2) and Annex 9. (Article 3) a student may be refused a grade or qualification in the given full-time course if the number of class absences exceeds 30% of the contact hours stipulated in the course description. Online attendance is not available.

Method for monitoring attendance

Attendance will be monitored by attendance lists. All relevant university regulations apply.

ASSESSMENT

Students will be assessed by the performance of the take-home project work. Progress is to be checked regularly. Neatness is part of the grade for all student work.

Course resulting in mid-term grade (PTE TVSz 40§(3))

Mid-term assessments, performance evaluation, and their weighting as a pre-requisite for taking the final exam

Type	Assessment	Weighting as a proportion of the pre-requisite for taking the exam
1. Take-home project	max 100 points	100 %

Requirements for the end-of-semester signature

- Evaluated take-home project must score 40 points or beyond.

Type of examination spoken

The exam is successful if the result is a minimum of 40%

Calculation of the grade (TVSsz 47§ (3))

The mid-term performance accounts for 50%, and the performance at the exam accounts for 50% of the final grade calculation.

Calculation of the final grade based on aggregate performance in percentage.

Course grade	Performance in %
excellent (5)	85 % ...
good (4)	70 % ... 85 %
satisfactory (3)	55 % ... 70 %
pass (2)	40 % ... 55 %
fail (1)	below 40 %

The lower limit given at each grade belongs to that grade.

4. SPECIFIED LITERATURE

COMPULSORY READING AND AVAILABILITY
