

COURSE SYLLABUS AND COURSE REQUIREMENTS
ACADEMIC YEAR 2025-2026 SEMESTER FALL

Course title	Fluid Mechanics in Engineering 2.
Course Code	MSB283ANEP
Hours/Week: le/pr/lab	1/1/0
Credits	2
Degree Programme	Civil Engineering BSc
Study Mode	Full-time
Requirement	Exam
Teaching Period	Semester 3
Prerequisites	Fluid Mechanics in Engineering 1.
Department	Civil Engineering
Course Director	Dr. Judit Pál-Schreiner
Teaching Staff	Dr. Judit Pál-Schreiner

COURSE DESCRIPTION

This course exposes students to an expansive suite of topics and methods within the field of water resources engineering, emphasizes engineering fluid mechanics (Hydrostatics).

SYLLABUS

1. GOALS AND OBJECTIVES

Fluid Mechanics is explores using fundamental conservation laws and ecologically-based design theory. Concept of this course is to learn about the properties of fluid, static fluid pressure, Euler's principle, manometers, hydrostatic forces, Pascal law, Archimedes's principle

2. COURSE CONTENT

	TOPICS
LECTURE	1. The properties of fluid 2. Hydrostatics's principle 3. Euler's principle 4. Archimedes's principle
PRACTICE	1. The properties of fluid Examples about 2. Hydrostatics's principle Examples about 3. Euler's principle Examples about 4. Archimedes's principle Examples about

DETAILED SYLLABUS AND COURSE SCHEDULE

LECTURE

week	Topic	Compulsory reading; page number	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	The properties of fluid, Hydrostatics's principle	[1.]		
2.	Euler's principle, Euler's principle in practice, manometers	[1.]		
3.	Hydrostatic forces	[1.]		
4.	Hydrostatic forces in practice	[1.]		
5.	Archimedes's principle	[1.]		
6.	Exam test		Exam test	15.10.2025

PRACTICE

week	Topic	Compulsory reading; page number	Required tasks (assignments, tests, etc.)	Completion date, due date
1.	The properties of fluid, Hydrostatics's principle in practice	[1.]		
2.	Euler's principle in practice, manometers	[1.]	Homework 1	24.09.2025
3.	Hydrostatic forces in practice 1	[1.]	Homework 2	08.10.2025
4.	Hydrostatic forces in practice 2	[1.]		
5.	Archimedes's principle in practice	[1.]	Homework 3	15.10.2025
6.	Practice Exam		Practice Exam	15.10.2025

3. ASSESSMENT AND EVALUATION

ATTENDANCE

In accordance with the Code of Studies and Examinations of the University of Pécs, Article 45 (2) and Annex 9. (Article 3) a student may be refused a grade or qualification in the given full-time course if the number of class absences exceeds 30% of the contact hours stipulated in the course description.

Method for monitoring attendance

Attendance sheet. Attendance Sheet will be filled during the Semester. Attending is required all classes, and will impact the grade (max. 10%). Unexcused absences will adversely affect the grade, and in case of absence from more than 30% of the total number of lesson will be grounds for failing the class. To be in class at the beginning time and stay until the scheduled end of the lesson is required, tardiness of more than 20 minutes will be counted as an absence. In the case of an illness or family emergency, the student must present a valid excuse, such as a doctor's note.

ASSESSMENT

Course-unit with final examination

Mid-term assessments, performance evaluation and their weighting as a pre-requisite for taking the final exam

Type	Assessment	Ratio in the final grade
Homeworks	10%(min 4%) -10%(min 4%)-10%(min 4%)	30%
Examtest	30% (min 12%)	30%
Practice Exam	30% (min 12%)	30%
Class attendance	10% (min 4%)	10%

Requirements for the end-of-semester signature

Each individual assessment must be at least 40% on its own.

Re-takes for the end-of-semester signature (PTE TVSz 50§ (2))

The specific regulations for grade betterment and re-take must be read and applied according to the general Code of Studies and Examinations

Examtest and Practice exam can be repeated/improved each at least once every semester.

Type of examination: written exam test

The exam is successful if the result is minimum 40 %

Calculation of the grade (TVSz 47§ (3))

Calculation of the final grade based on aggregate performance in percentage.

Course grade	Performance in %
excellent (5)	85 % - 100 %
good (4)	70 % - 84 %
satisfactory (3)	55 % - 69 %
pass (2)	40 % - 54 %
fail (1)	0 % - 39 %

4. SPECIFIED LITERATURE

COMPULSORY READING AND AVAILABILITY

[1.] Lecture notes ppt.

RECOMMENDED LITERATURE AND AVAILABILITY

[2.] Fluid Mechanics: Fundamentals & Applications, Fourth Edition by John M. Cimbala

[3.] 1000 Solved Problems in Fluid Mechanics by K Subramanya

[4.] Fluid Mechanics (SIE) by Frank White
